Enclosed are three (3) copies each of our cost proposals for TD-1024A, TD-1026A, and TD-1027A.

TD-1024A covers our estimated costs resulting from a requirement to add film footage pots to the stellar/index take-up assembly. The work involved is primarily in two areas. The first covers a modification to our existing cables and sideplates of the pan cassette. The second half of the effort involves modification to all our two- and three-bay consoles to provide the capability of giving the proper commands and assurance that the commands are being executed properly.

STATINTL The proposal indicates a total estimated cost of [ ] STATINTL incentive fee of [ ] for a total C.P.I.F. value of [ ] STATINTL

TD-1026A covers the cost of adding a rosette to our platen and shutter assembly in each of the units to indicate on the film the completion of an orbit.

STATINTL The proposal indicates a total estimated cost of [ ] STATINTL incentive fee of [ ] for a total C.P.I.F. value of [ ] STATINTL

TD-1027A is a small study TD under which we will investigate the feasibility of an illumination measuring device. If the feasibility is proven, the TD will be completed by the submission of a design as well as a cost proposal indicating manufacturing and installation costs of the meter in future L Program flights.

The proposal indicates a total estimated cost of [ ] STATINTL incentive fee of [ ] STATINTL for a total C.P.I.F. value of [ ] STATINTL

We trust these proposals will meet with your approval.

Very truly yours,

[ ]
